

Case Study

Pay Check

Keeping competitive
with Epay

Pay Check Ltd provide specialist managed payroll and pension services for businesses. As of March 2016, Pay Check processed 1,886 payrolls, including a total of 48,972 payslips.

The Challenge

Pay Check have worked with Datagraphic for many years, buying payroll stationery and offering Epay to their clients. But one document type they hadn't explored was online P45s.

When HMRC confirmed that legal advice had changed (to allow P45s to be issued electronically), the move enabled Pay Check to switch to online P45s to move away from their inefficient paper procedure.

By printing the P45s, Pay Check also found they weren't able to provide a complete online service to their clients, for example

payslips and P60s could be delivered online but P45s were still delivered by post. Pay Check wanted to eliminate all aspects of print for their online clients.

Last year, HMRC confirmed that legal advice had changed. The long held view, that only hard copies of P45s were acceptable, changed to allow them to be issued electronically. This news enabled Pay Check to move away from an inefficient procedure.

Datagraphic's Epay application met the challenge.

"The online service has created an added service revenue source and has allowed us to remain competitive with other service providers also offering online services."

Payroll Manager

Results Achieved

- **P45s presented online, removing labour intensive print process**
- **Improved service for clients' employees with more payroll documents accessible online in one location**
- **Secure access to current and historical pay information from any Internet enabled device**
- **Pay Check able to respond to fluctuating volumes of P45s with more resource to process**

Why Datagraphic?

We partner with organisations to provide a secure end-to-end document automation service that is simple, liberating and integrated.

Whether you're communicating with customers, suppliers, employees or all three, our friendly and dedicated team will help you deliver accurate, efficient and future-proofed communications without buying expensive software or costly equipment.
