

# Confidently compliant.

Multichannel sustainable mail  
from a FSQS-registered supplier.

**Datagraphic**

## Deliver smarter. Stay compliant.

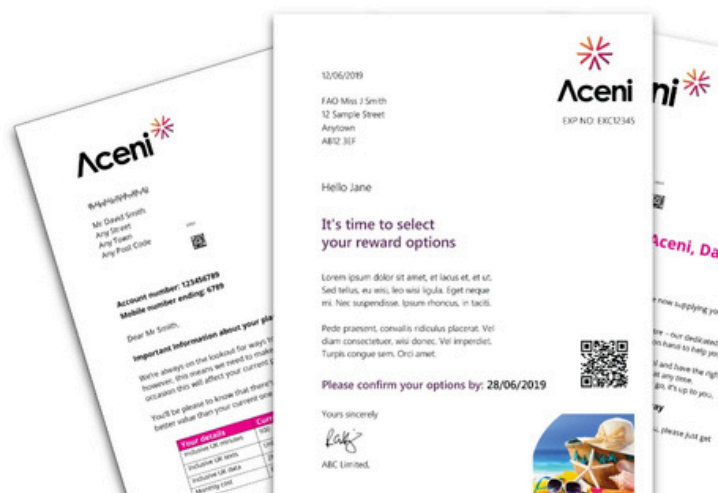

If you send financial communications,  
you need total confidence in your supplier.

Datagraphic is **FSQS-registered** and delivers secure, UK GDPR compliant, sustainable, outbound and inbound mail services, through its multichannel communications platform Aceni - used and trusted by financial services companies.

### Why Aceni?

- ✓ **Auditable** Aceni processes mail providing real-time production and return mail audit trails and SLA tracking.
- ✓ **Time, effort and money saving:** Aceni streamlines workflows, and cuts postage costs: no minimum orders.
- ✓ **Sustainable by design:** Aceni prepares carbon-neutral mail to support your net-zero goals and ESG metrics.

**Aceni is ready when  
you are to deliver  
mail smarter.**

# Introduction

In an industry shaped by regulation and accountability, financial services procurement teams face growing pressure around compliance, ESG criteria, and supplier risk management.

**With FSQS, supplier pre-qualification is already done.**

Due diligence is carried out using verified supplier information, which means faster onboarding, lower risk, and fewer procurement hurdles.

## **Datagraphic is FSQS-registered.**

We deliver secure document and mail automation solutions tailored for financial services companies.

**This reflects the highest standards in compliance, transparency, and sustainability.**

**Simplified procurement, reduced risk, and in-built support towards your organisation's net-zero ambitions.**

# Mitigate procurement risks. Assure compliance. Reduce the red tape.

We understand that financial services procurement is more than buying solutions - it's about making decisions to protect the organisation's reputation and choose to work with accountable partners.

Working with an FSQS registered supplier like Datagraphic allows your team to:

## **Streamline due diligence during RFIs and audits.**

All of our certifications can be seen in one place, on our FSQS profile.

## **Ensure compliance readiness.**

To maintain compliance, we keep core ISO standards like 14001, 22301, 27001, 45001 and more updated.

## **Mitigate legal and reputational risks.**

Proven policies and procedures avoid gaps in compliance, helping to reduce third-party risks.

**Confidence that every stage of your communications is secure, sustainable, and compliant - from data handling to delivery.**

# Supporting ESG goals with transparent operations.

Sustainability and governance are essential procurement criteria. FSQS incorporates ESG into its assessments, and Datagraphic leads the way with:

SCIENCE  
BASED  
TARGETS

## Carbon-neutral operations.

Datagraphic has approved near and long-term science-based emissions reduction targets with the **SBTi** to help buyers accurately track Scope 3 CO<sub>2</sub>e.

## Committed to sustainability.

We are independently verified for ethical, sustainability and governance commitments, including **B Corp Certification** and **The Climate Pledge**.

## Certified

Corporation

## Environmental impact reporting.

Aceni, has a full Environmental Product Declaration (EPD) to show the entire lifecycle of its print services and energy-intensive workflows.

**Independent validation that operations comply with evolving reporting and regulatory requirements.**

# Practical procurement benefits.

Choosing Datagraphic's Aceni for your secure multichannel mail delivers tangible advantages.

- ✓ **Centralise document production**  
See exactly who is sending communications, and in what configurations, to help identify cost savings.
- ✓ **Better regulatory compliance**  
Same working day processing by digital automation accelerates delivery and reduces manual errors.
- ✓ **System compatibility**  
Aceni integrates seamlessly with your legacy systems, requiring minimal IT resources.
- ✓ **Procurement reporting**  
Users can access service-level dashboards and reports aligned with contract KPIs.
- ✓ **Scalable solution.**  
Aceni is cloud-based and production scales up and down to scale with the needs of any size team, wherever they need to work.

**Faster procurement cycles, improved performance, stronger cross-team collaboration and flexibility to meet demand.**
